Predicting Heart Failure from Behavioral Risk Factor Data

Paige Galvan, Neha Deshpande, & Witlie Leslie

2024-11-25

Introduction (Witlie)

Motivation (Neha)

- Investigating heart failure, a condition impacting millions worldwide, and exploring its complex causes and contributing factors.

- Spotting patterns between risk factors and how heart failure progresses to get a better understanding.

Linearity and Normality (Neha)

Logistic Regression (Witlie)

SVM & Random Forest (Paige)

Results (Paige)
